

TRUNK PROTECTOR

Trunk Protector is used around the base of trees to prevent damage from lawnmowers, edgers, and string trimmers. The coiled shape allows it to expand with the growth of the tree. It is vented, which permits the tree to breathe and it is notched at the base to accommodate root flare.

NDS Trunk Protector is colored to help it blend with the natural shade of the tree. Each unit fits up to a 4" caliper tree; multiple units may be used for larger trees.

Specifications: Product shall be Trunk Protector by NDS. Material shall be made of Low Density Linear Polyethylene (LDLPE) and must contain U.V. inhibitors to insure longevity. Product shall measure 8" high, 12" wide and ± .050" thick. Slotted vents shall be 1" high by 1/4" wide, with bottom row creating a serrated lower edge.

Part No.	Description	Color	Pkg. Qty.	Wt. Ea. (lbs.)	Product Class
TP-128	Trunk Protector	Gray	50	0.16	50TP

ASTM SPECIFICATIONS Trunk Protector					
Properties	Tensile Stress	Elongation @ Break	Flexural Modulus	Brittleness Temp	Melt Temperature
ASTM Test (Units)	D638 (psi)	D638 (psi)	D790A (psi)	D746 (°F)	DTA (°F)
Values	3,900	900	150,000	L-95° F	240

RECOMMENDED INSTALLATION

Any tree planted in lawn or brush areas where mowing or trimming equipment may cause contact with tree trunks.

Note: All dimensions are nominal. All weights are for shipping purposes only. Availability is subject to change.
